

Standards for Concentrations

Approved by the Engineering College Council, 17 September 2009

A concentration is administered and verified by a department, is intended to allow students to develop a competency in a distinct area within a College major, and comprises three key requirements:

1. An organizing theme;
2. At least 9 credits of course work, all of which can be within existing degree requirements;
and
3. Approval by the appropriate body within the originating department and ratification by the College Council.
