

# Chemical and Biomolecular Engineers

as you consider graduate school, consider the University of Notre Dame

In addition to receiving a world-class education at the University of Notre Dame, graduate students in CBE perform unique research with distinguished faculty, receive teaching opportunities and training, benefit from an award-winning professional development program, and apply their skills to a professional career in industry, academia, or government upon graduation.

## Program Profile

- Low 4-to-1 student-to-faculty ratio
- Typical class size of 15
- Faculty and students travel to national and international conferences
- Students receive generous stipends, full tuition scholarships, and a health insurance subsidy
- Students typically compete for major internal and external awards, fellowships, and scholarships

## Broad Research Categories

- Bioengineering
- Energy and Sustainability
- Materials and Nanotechnology
- Nanofluidics and Microfluidics
- Simulation and Theory

## Student Statistics

- Over 80 graduate students
- High PhD completion rate of 85%
- Average time-to-degree of 5 years
- Consistent placement in degree-related industry and academia upon graduation

## Admissions

- Applicants are admitted primarily to the doctoral program in the fall term and can obtain the MS degree after completing a set of requirements while pursuing the PhD degree
- Fall Deadline: January 15

## Outstanding Faculty

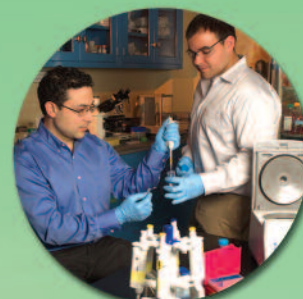

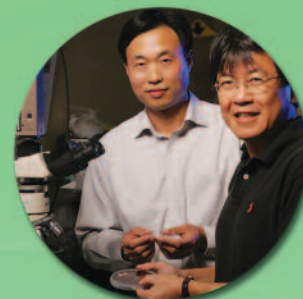

- 20 Faculty and 5 Concurrent Faculty
- 2 members of the National Academy of Engineering
- Diverse Research Projects
- Recipients of national research and teaching awards

## Student Resources

- Kaneb Center for Teaching and Learning
- Professional Development Program
- Graduate Career Services
- Departmental Lecture Series
- Graduate Life Program
