RESEARCH INTERESTS

model reduction · finite element and discontinuous Galerkin methods · high-order discretizations · numerical methods for shocks and discontinuities · topology optimization · PDE-constrained optimization · multiphysics and multiscale problems · uncertainty quantification

ACADEMIC POSITIONS

- 2016–2018 **Luis W. Alvarez Postdoctoral Fellow**, Department of Mathematics, Lawrence Berkeley National Laboratory
2016–2018 **Postdoctoral Scholar**, Department of Mathematics, University of California, Berkeley
2015–2016 **Research Assistant**, Department of Aeronautics and Astronautics, Stanford University

EDUCATION

- Sep 2016 **Ph.D., Computational and Mathematical Engineering, Stanford University** *Stanford, CA*
Advisor: Charbel Farhat; GPA: 4.0
Ph.D. Minors: Mechanical Engineering, Aeronautics and Astronautics
Funding: Department of Energy Computational Science Graduate Fellowship
Dissertation: “Adaptive model reduction to accelerate optimization problems governed by partial differential equations”
- June 2016 **M.S., Computational and Mathematical Engineering, Stanford University** *Stanford, CA*
Advisor: Charbel Farhat; GPA: 4.15
- May 2011 **B.S., Civil and Environmental Engineering, University of California, Berkeley** *Berkeley, CA*
Minor: Mathematics; Advisor: Sanjay Govindjee; GPA: 3.99

OVERVIEW

19 papers: 8 journal, 10 conference, 1 book chapter
Luis W. Alvarez Postdoctoral Fellowship recipient (2016–2018)
Robert J. Melosh Medall Finalist: best student paper in finite element analysis (2015)
Department of Energy Computational Science Graduate Fellowship recipient (2011–2015)
Designed, taught advanced MATLAB programming course (CME292) at Stanford University while a graduate student
1 education grant: \$40k from MathWorks to convert CME292 into Massive Open Online Course (MOOC)
University Medal Finalist, UC Berkeley: ranked in top 5 of graduation class (2011)
Civil Engineering Department Citation, UC Berkeley: ranked 1st in CE department (2011)

HONORS & AWARDS

- Jun 2017 **Gene Golub Dissertation Award**, Stanford University *Stanford, CA*
2016–2018 **Luis W. Alvarez Postdoctoral Fellowship**, Lawrence Berkeley National Laboratory *Berkeley, CA*
Jun 2015 **MathWorks grant (\$40k) to convert CME292 (Stanford University) into MOOC**
Apr 2015 **Robert J. Melosh Medall Finalist**, Duke University *Durham, NC*
2011–2015 **Department of Energy Computational Science Graduate Fellowship**
May 2011 **University Medal Finalist**, University of California, Berkeley *Berkeley, CA*

- Feb 2017 **Early Career Travel Award**
- 2013–2016 **Student Travel Award**
- May 2011 **Civil Engineering Department Citation**, University of California, Berkeley *Berkeley, CA*
- Aug 2010 **Best Project Award, 2010 AHPARC Summer Institute Presentation**, Stanford University *Stanford, CA*
- Apr 2010 **Structural Engineers Association of N. California (SEAONC) Scholarship**
- May 2009 **Louise Cooper Endowment**, University of California, Berkeley *Berkeley, CA*
- Aug 2009 **Best Overall Project, 2009 Young Researchers Symposium**

GRANTS & FUNDING

RESEARCH

- 2016–2018 *Enabling Extreme-Scale Many-Query Computational Physics: An adaptive framework for optimization and uncertainty quantification of multiphysics applications* (Principal Investigator), \$232500, Laboratory Directed Research and Development, Lawrence Berkeley National Laboratory

EDUCATION

- 2016–2017 *Advanced MATLAB programming for scientific computing* (Principal Investigator), \$40000, Development of Massively Open Online Course (MOOC), MathWorks

PUBLICATIONS

THESIS

- [1] M. J. Zahr, *Adaptive model reduction to accelerate optimization problems governed by partial differential equations*. PhD thesis, Stanford University, August 2016

BOOK CHAPTER

TEACHING EXPERIENCE & RESEARCH MENTORING

CURRICULUM DEVELOPMENT AND INSTRUCTION

- Smr 2013 **Classical Solutions to Partial Differential Equations (CME 001)**, Stanford University
Refresher course intended to prepare first year ICME for upcoming coursework and qualifying exams
- Spr 2014 **Advanced MATLAB for Scientific Computing (CME 292)**, Stanford University
- Aut 2014 Intended to teach graduates students advanced MATLAB topics useful in research; Applications drawn from scientific computing: linear algebra and optimization, ODEs/PDEs, etc; *Award*: Received \$40k grant from MathWorks
- Spr 2015 Intended to teach graduates students advanced MATLAB topics useful in research; Applications drawn from scientific computing: linear algebra and optimization, ODEs/PDEs, etc; *Award*: Received \$40k grant from MathWorks to convert course into MOOC
- Spr 2017 **Model Reduction (CME 345)**, Stanford University
Presents the basic mathematical theory for projection-based model reduction

RESEARCH MENTORING

- Smr 2018 **Robert Baraldi**, *Ph.D., Applied Mathematics, University of Washington*
Project: Efficient Bayesian inversion using adaptive model reduction and sparse grids
- Smr 2017 **Zhengyu Huang**, *Ph.D., Computational and Mathematical Engineering, Stanford University*
Project: A high-order partitioned solver for general multiphysics problems and the corresponding fully discrete sensitivity and adjoint methods
- Spr 2017 **Jingyi Wang**, *Ph.D., Mechanical Engineering, University of California, Berkeley*
Project: Frequency
- Spr 2016 **Gabriele Boncoraglio**, *M.S., Aeronautics and Astronautics, Stanford University*
Project: Accelerating PDE-constrained optimization with partially converged solutions and model reduction
- Aut 2015 **Christina White**, *M.S., Mechanical Engineering, Stanford University*
Project: Machine learning algorithms in model order reduction
- Smr 2015 **Fredrick Earnest**, *B.S., Mechanical and Aerospace Engineering, New Mexico State University*
Undergraduate Research Intern, Army High Performance Computing Research Center, Stanford University
Project: Projection-based model order reduction for nonlinearly constrained contact

- Smr 2014 **Joseph Graff**, *B.S., Mechanical and Aerospace Engineering, New Mexico State University*
Undergraduate Research Intern, Army High Performance Computing Research Center, Stanford University
Project: Automated mesh generation and validation for CFD analysis and shape optimization
- Smr 2014 **Zach Nevills**, *B.S., Mechanical Engineering, Stanford University*
Undergraduate Research Intern, Army High Performance Computing Research Center, Stanford University
Project: Automated mesh generation and validation for CFD analysis and shape optimization
- Smr 2014 **Harry Pham**, *B.S., Mechanical Engineering, Stanford University*
Undergraduate Research Intern, Army High Performance Computing Research Center, Stanford University
Project: Implementation of an aeroelastic shape optimization driver
2nd Place, Best Project Award

JOURNAL REFEREE

American Institute of Astronautics and Aeronautics (AIAA) Journal · Annual Reviews in Control (ARC) · Computer Methods in Applied Mechanics and Engineering (CMAME) · International Journal for Numerical Methods in Engineering (IJNME) · Journal of Computational Physics (JCP) · Journal of Computational Science (JCS) · Journal of Computational and Applied Mathematics (JCAM) · Optimization and Engineering (OPTE)

BOOK CHAPTER REFEREE

Institute for Mathematics and its Applications (IMA)

CONFERENCE SESSION CHAIR

M.J. Zahr, “MS: Applications of Computational Fluid Dynamics,” 43rd AIAA Fluid Dynamics Conference and Exhibit, San Diego, CA, June 24–27, 2013

M.J. Zahr, “MS: Applications of Optimization,” SIAM Conference on Optimization, San Diego, CA, May 19–22, 2014

MINISYMPOSIUM ORGANIZATION

F. Chinesta, E. Cueto, C. Farhat, M.J. Zahr, “Model Reduction, Big Data, and Dynamic Data-Driven Systems,” World Congress on Computational Mechanics XIII (WCCM XIII), New York City, NY, July 22 – July 27, 2018

F. Chinesta, E. Cueto, C. Farhat, M.J. Zahr, “Model Reduction, Big Data, and Dynamic Data-Driven Systems,” 6th European Conference on Computational Mechanics, 7th European Conference on Computational Fluid Dynamics, Glasgow, Scotland, UK, June 11 – June 15, 2018

A. Manzoni, M.J. Zahr, “MS145: Reduced order modeling techniques in large scale and data-driven PDE problems,” SIAM Conference on Computational Science and Engineering, Atlanta, GA, February 27 – March 3, 2017

SEMINAR ORGANIZATION

Applied Mathematics Seminar, *Lawrence Berkeley National Laboratory, University of California, Berkeley*. Organizers: M.J. Zahr, L. Lin, P. Persson. Aut 2017, Spr 2018. <http://math.lbl.gov/ams>.

WORKSHOP ORGANIZATION

2017 West Coast ROM Workshop, *Lawrence Berkeley National Laboratory*. Organizers: K. Carlberg, M.J. Zahr. November 17, 2017. <http://math.lbl.gov/~mjzahr/wcrw2017/>.

OUTREACH ORGANIZATION

- Mar 2016 **Central Catholic High School Career Day** *Modesto, CA*
- Mar 2017 Presentation: Computational methods to solve next-generation science and engineering grand challenge problems; A workshop intended to demonstrate the real-world impact of CSE, convey my excitement and passion for the field, and hopefully motivate a diverse group of students to consider a CSE career

WORK EXPERIENCE

- Jun 2015 – **Research intern** *Livermore, CA*
Sep 2015 Extreme-Scale Data Science and Analytics Department, Sandia National Laboratories
Project: PDE-constrained optimization under uncertainty using model reduction and sparse grids
- Jun 2012 – **Research intern** *Berkeley, CA*
Sep 2012 Department of Mathematics, Lawrence Berkeley National Laboratory
Project: Performance tuning for discontinuous Galerkin methods

- Jan 2011 – **Book reviewer** Berkeley, CA
 May 2011 Department of Mechanical Engineering, University of California, Berkeley
 Reviewed and edited two books written by Prof Tarek Zohdi prior to publication
- T. I. Zohdi, *Electromagnetic Properties of Multiphase Dielectrics: A Primer on Modeling, Theory and Computation*, vol. 64. Springer Science & Business Media, 2012
 - T. I. Zohdi, *Dynamics of Charged Particulate Systems: Modeling, Theory and Computation*. Springer Science & Business Media, 2012
- Jun 2010 – **Research intern** Stanford, CA
 Sep 2010 Department of Aeronautics and Astronautics, Stanford University
 Project: MORTestbed: A testbed for the comparison of model order reduction techniques on benchmark problems
- Jun 2009 – **Research intern** Golden, CO
 Aug 2009 Geologic Hazards Team, United States Geological Survey
 Project: Mitigation of seismic risk pertaining to non-ductile concrete buildings using seismic risk maps

TALKS

SEMINAR

- M. J. Zahr, “Optimization-based computational physics and high-order methods: from optimized analysis to design and data assimilation,” in *LBNL CRD Postdoc Seminar Series*, (Berkeley, California), Lawrence Berkeley National Laboratory, 9/18/2017
- M. J. Zahr, “Gradient-based optimization of flow problems using the adjoint method and high-order numerical discretizations,” in *Applied, Computational, and Industrial Math Seminar Series*, (San Jose, California), San Jose State University, 5/8/2017
- M. J. Zahr and P.-O. Persson, “Optimization of CFD simulations, with MRI applications,” in *TESLA Seminar*, (Lunda, Sweden), Lund University, 3/31/2017
- M. J. Zahr, “Adaptive model reduction to accelerate optimization problems governed by partial differential equations,” in *Farbat Research Group Seminar*, (Stanford, California), Stanford University, 1/10/2017
- M. J. Zahr, “Adaptive model reduction to accelerate optimization problems governed by partial differential equations,” in *LBNL Postdoc Seminar Series*, (Berkeley, California), Lawrence Berkeley National Laboratory, 1/9/2017
- M. J. Zahr, “Adaptive model reduction to accelerate optimization problems governed by partial differential equations,” in *Thesis Defense*, (Stanford, California), Stanford University, 8/3/2016
- M. J. Zahr, “Efficient PDE-constrained optimization under uncertainty using adaptive model reduction and sparse grids,” in *CME 500 Seminar*, (Stanford, California), Stanford University, 4/11/2016
- M. J. Zahr, “Accelerating PDE-constrained optimization problems using adaptive reduced-order models,” in *University of Notre Dame Aerospace and Mechanical Engineering Seminar (Host: Gretar Tryggvason)*, (South Bend, Indiana), University of Notre Dame, 3/3/2016 – 3/4/2016
- M. J. Zahr, “Accelerating PDE-constrained optimization problems using adaptive reduced-order models,” in *University of Southern California Aerospace and Mechanical Engineering Seminar (Host: Geoff Spedding)*, (Los Angeles, California), University of Southern California, 2/25/2016 – 2/26/2017
- M. J. Zahr, “Accelerating PDE-constrained optimization problems using adaptive reduced-order models,” in *Luis W. Alvarez Fellowship Seminar (Host: Jonathan Carter)*, (Berkeley, California), Lawrence Berkeley National Laboratory, 2/9/2016
- M. J. Zahr, “Accelerating PDE-constrained optimization problems using adaptive reduced-order models,” in *J. H. Wilkinson Fellowship Seminar (Host: Sven Leyffer)*, (Argonne, Illinois), Argonne National Laboratory, 1/15/2016
- M. J. Zahr, “Accelerating PDE-constrained optimization problems using adaptive reduced-order models,” in *John von Neumann Postdoctoral Fellowship Seminar (Host: Denis Ridzal)*, (Albuquerque, New Mexico), Sandia National Laboratories, 1/11/2016
- M. J. Zahr and P.-O. Persson, “High-order methods for optimization and control of conservation laws on deforming domains,” in *Dean Seminar at Sandia National Laboratories (Host: Kevin Carlberg)*, (Livermore, California), 12/14/2015
- M. J. Zahr, “Accelerating PDE-constrained optimization problems using adaptive reduced-order models,” in *Sidney Fernbach Postdoctoral Fellowship Seminar (Host: Jeffrey A. F. Hittinger)*, (Livermore, California), Lawrence Livermore National Laboratory, 12/9/2015
- M. J. Zahr, “High-order methods for optimization and control of conservation laws on deforming domains,” in *Farbat Research Group Seminar*, (Stanford, California), Stanford University, 12/8/2015

- M. J. Zahr and P.-O. Persson, “High-order methods for optimization and control of conservation laws on deforming domains,” in *Applied Mathematics Seminar at UC Berkeley (Host: Per-Olof Persson)*, (Berkeley, California), 9/30/2015
- M. J. Zahr and C. Farhat, “Accelerating PDE-constrained optimization using adaptive reduced-order models,” in *Seminar at Sandia National Laboratories (Host: Drew Kouri)*, (Albuquerque, New Mexico), 7/8/2015

- K. Carlberg, J. Cortial, D. Amsallem, M. J. Zahr, and C. Farhat, “The GNAT nonlinear model reduction method and its application to fluid dynamics problems,” in *6th AIAA Theoretical Fluid Mechanics Conference*, (Honolulu, Hawaii), 6/27/2011 – 6/30/2011
- D. Amsallem, M. J. Zahr, and C. Farhat, “On the robustness of residual minimization for constructing POD-based reduced-order CFD models,” in *43rd AIAA Fluid Dynamics Conference and Exhibit*, (San Diego, California), 6/27/2011 – 6/30/2011

POSTER

- M. J. Zahr and P.-O. Persson, “Adjoint-based optimization, uncertainty quantification, and data assimilation of multiphysics systems using high-order numerical discretizations,” in *DOE ASCR Applied Mathematics PI Meeting*, (Washington D.C.), 9/11/2017 – 9/12/2017
- M. J. Zahr, “Efficient PDE-constrained optimization using adaptive model reduction,” in *Institute for Mathematics and its Applications: Frontiers in PDE-Constrained Optimization*, (Minneapolis, Minnesota), 6/6/2016 – 6/10/2016
- M. J. Zahr, “Efficient PDE-constrained optimization using adaptive model reduction,” in *2016 Stanford Computational Mathematics and Engineering Affiliates Meeting*, (Stanford, California), 5/1/2016
- M. J. Zahr, “Efficient PDE-constrained optimization using adaptive model reduction,” in *2016 Stanford Aerospace and Astronautics Affiliates Meeting*, (Stanford, California), 4/26/2016
- M. J. Zahr and C. Farhat, “Accelerating PDE-constrained optimization using adaptive reduced-order models,” in *Army High Performance Computing Research Center (AHPARC) Review Meeting*, (Santa Cruz, California), 1/18/2016 – 1/20/2016
- M. J. Zahr, P. Avery, and C. Farhat, “A hyperreduced FE^2 method for real-time multiscale simulations,” in *Army High Performance Computing Research Center (AHPARC) Review Meeting*, (Santa Cruz, California), 1/18/2016 – 1/20/2016
- M. J. Zahr and C. Farhat, “Accelerating PDE-constrained optimization using progressively-constructed reduced-order models,” in *Army High Performance Computing Research Center (AHPARC) Review Meeting*, (Santa Cruz, California), 8/10/2015 – 8/12/2016
- M. J. Zahr and P.-O. Persson, “Unsteady PDE-constrained optimization using high-order DG-FEM,” in *13th U.S. National Congress on Computational Mechanics (USNCCM13)*, (San Diego, California), 7/26/2015 – 7/30/2015
- M. J. Zahr and C. Farhat, “Progressive construction of a parametric reduced-order model for PDE-constrained optimization,” in *2014 DOE CSGF Annual Program Review*, (Washington D.C.), 7/14/2014 – 7/17/2014
- M. J. Zahr, “PDE-constrained optimization using progressively constructed reduced-order models,” in *2014 Stanford Aerospace and Astronautics Affiliates Meeting*, (Stanford, California), 4/28/2014
- M. J. Zahr and C. Farhat, “Rapid topology optimization using reduced-order models,” in *2013 DOE CSGF Annual Program Review*, (Washington D.C.), 7/25/2013 – 7/27/2013
- M. J. Zahr and C. Farhat, “Rapid structural shape optimization using progressively constructed reduced-order models,” in *12th U.S. National Congress on Computational Mechanics (USNCCM12)*, (Raleigh, North Carolina), 7/22/2013 – 7/25/2013
- M. J. Zahr and C. Farhat, “Design of fluid mechanical systems using reduced-order models,” in *2012 DOE CSGF Annual Program Review*, (Washington D.C.), 7/26/2012 – 7/28/2012
- M. J. Zahr, C. Farhat, K. Carlberg, and D. Amsallem, “Comparison of model reduction techniques on linear and nonlinear electrical, mechanical, and biological systems,” in *UC Berkeley Undergraduate Research Poster Session*, (Berkeley, California), 4/19/2011
- M. J. Zahr, C. Farhat, K. Carlberg, and D. Amsallem, “Comparison of model reduction techniques on linear and nonlinear electrical, mechanical, and biological systems,” in *2011 SIAM Conference on Computational Science and Engineering (CSE11)*, (Reno, Nevada), 3/1/2011
- M. J. Zahr, N. Luco, and H. Ryu, “Mitigation of seismic risk pertaining to non-ductile concrete buildings using seismic risk maps,” in *2009 PEER Annual Meeting*, (San Francisco, California), 10/15/2009 – 10/16/2009
- M. J. Zahr, N. Luco, and H. Ryu, “Mitigation of seismic risk pertaining to non-ductile concrete buildings using seismic risk maps,” in *2009 Young Researcher’s Symposium*, (Buffalo, New York), 8/20/2009 – 8/22/2009

TECHNICAL SKILLS

C++, MATLAB, Python programming · Unix, LaTeX · COMSOL, Finite Element Analysis Program (FEAP), SAP 2000 · MPI, OpenMP parallelism · AutoCAD

OTHER INTERESTS

boxing · hiking · weightlifting · downhill skiing · running
